

GenAI Engineer with experience building practical AI-powered applications using LLM APIs, Python, and prompt engineering. Skilled in developing automation tools, SQL generation systems, and data-driven applications using LangChain, OpenAI, and Groq APIs. Strong background in data analytics and dashboard development, enabling the delivery of business-focused AI solutions

SKILLS

GenAI and LLMs	LangChain, Prompt Engineering, OpenAI and Groq API, Model Fine Tuning, RAG (Retrieval-Augmented Generation), LLM Application Development,
Vector Databases	Pinecone, ChromaDB
Programming Language	Python (Pandas, NumPy), SQL
Data & Analytics	Power BI, Excel, Data Analysis
Machine Learning	Scikit-learn (Classification models, preprocessing, model evaluation)
Cloud and Tools	Streamlit, Git, Jupyter Notebook
Soft Skills	Problem Solving, Stakeholder Communication, Documentation

TECHNICAL EXPERIENCE

GenAI Engineer <i>Tata Consultancy Services</i>	Dec 2024 – Present <i>Noida, Uttar Pradesh</i>
- Designed and deployed an LLM-powered SQL generation system using RAG architecture, LangChain, and Open Source LLM models, reducing manual query drafting effort by 75%. - Applied efficient vector databases and prompt engineering techniques to improve accuracy in SQL Query Generation. - Reduced manual effort in query writing, improved report turnaround time and reduced team dependencies.. - Deployed production solution via Streamlit for enterprise users. - Collaborated with analysts and stakeholders to refine outputs based on business requirements.	
Data Analyst <i>Tata Consultancy Services</i>	Oct 2022 – Nov 2024 <i>Noida, Uttar Pradesh</i>
- Designed and deployed 10+ Power BI dashboards, enabling leadership to track KPIs and optimize reporting efficiency by 35%. - Designed finance dashboard for client to track the inflow and outflow of funds. - Automated data preparation tasks using Python and SQL - Published dashboards via Power BI Service and provided post-deployment support. - Ensured data accuracy and reliability for periodic business reporting.	
Assistant System Engineer <i>Tata Consultancy Services</i>	Oct 2020 – Sept 2022 <i>Gurugram, Haryana</i>
- Automated repetitive processes, reducing human error rates by 30% and improving turnaround time. - Led a 7-member team to enhance service quality and streamline client reporting. - Conducted knowledge transfer sections between the team members resulting in a 15% increase in team productivity and reduced dependencies.	

END TO END PROJECTS

GenAI-Powered Loan Approval Assistant using OpenAI API
- Developed an intelligent loan approval assistant leveraging OpenAI API and machine learning models to enhance decision-making. - Integrated a Streamlit-based conversational interface to capture applicant details and provide real-time, explainable predictions. - Implemented Retrieval-Augmented Generation (RAG) concepts to simulate policy-based decision support and contextual responses. - Automated traditional loan evaluation workflows by combining predictive modeling with generative AI for insights and justification. - Applied data preprocessing, feature engineering, and model evaluation techniques alongside prompt engineering for improved accuracy and interpretability

EDUCATION

Master’s in Business Administration , Manipal University Jaipur	Nov 2025
Bachelor of Science - Computer Science , Delhi University	Aug 2020

ACHIEVEMENTS

Star Performer of the Month for securing 100% systems from downtime	Oct 2024
Certificate of Achievement for growing client relationship	May 2024
Contextual Master for Process Optimization	Oct 2022
